

Highway Maintenance Specialists Limited

Environmental Policy

HMS recognises and accepts that it has a direct responsibility for the environment.

HMS is committed to reducing its environmental impact and continually improving its environmental performance.

We will comply with all relevant environmental legislation and regulations.

We will minimise and wherever possible eliminate, the release of any pollutant that may cause environmental damage to the air, water or earth or its inhabitants.

We will minimise the risk of environmental damage by adopting safe technologies and operating to set procedures.

We will minimise the creation of waste and wherever possible recycle materials. We will dispose of our waste in a safe and responsible way.

We will reduce the impact of transportation of staff wherever possible.

We will work with our suppliers to improve their environmental performance, and will favour our suppliers who can help us to meet our environmental commitment, objectives and targets.

We will ensure that all staff are fully aware of their environmental responsibilities in terms of these principals. Specific training will be given to employees who have a direct impact in the environmental performance of HMS.

We will provide the necessary resources to achieve the objectives laid out above.
