

Flexi®Range from HMS®

Our Flexi Range systems include:

- Flexi-Seal – Saw Cut/Seal
- Flexi-Band Standard – Fibre Reinforced Band
- Flexi-Band Plus – Fibre Reinforced Band using Approved Products
- Flexi-Screed – Fibre Reinforced Inlaid/Recess Repair and also
- Flexi-Joint – Full Depth Repair (Highway Agency Approved System) – Highways Approved Certificate 026

Our Flexi Range products encompass several levels of repair. From the cost effective blow out and seal overband to the saw cut or planed out inlaid reflective crack treatment all of which have been extensively used.

Our Flexi Range products have been based on the proven Flexi-Joint system. The sealant is a specially blended polymer modified bituminous screed system incorporating SBS polymers, selected bitumen's, process oils and extenders. Combining a uniform distribution of chopped fibres and aggregates the Flexi Range products provide a stable and effective treatment to reflective cracking with improved elastomeric performance for easy and rapid application.
