

# Resin Bonded Paving from HMS®

**Decra®Stone Resin Bonded Surfacing is a non-permeable decorative surface that uses natural aggregates bonded with high performance resins to create a low maintenance and hard-wearing surface**

## **Key benefits:-**

- Gives the appearance of small grade gravel surface with very little stone migration
- The sealed surface prevents weed growth
- Can be overlaid on existing good quality tarmac
- Very hard wearing - suitable for both domestic and commercial/industrial use including driveways, paths, public realm areas, car parks and shopping centres.
- Extremely low maintenance - no need for specialist cleaning products or equipment
- Highly durable and slip resistant
- Available in a wide range of decorative aggregates, in a variety of colours and textures to complement, enhance or contrast with your surroundings
- Guarantees are offered on materials and workmanship
